

## ChemoCentryx Investigator Sponsored Research Concept Form

ChemoCentryx is committed to advancing science by supporting external independent research activities.

To review the areas of interest please visit <https://www.chemocentryx.com/company/grants/independent-medical-education-ime/>.

Additional related topics may also be considered. Research studies may include clinical studies, epidemiologic and/or database driven evaluations, and preclinical in vivo and in vitro designs.

For healthcare professionals interested in a preliminary evaluation of potential ChemoCentryx support for independently conducted research studies, please respond to the questions below.

Investigator Institution:					
Investigator Name:					
Contact Telephone #:		Fax:		Email:	
Objective:					
Study Design:					
Estimated budget (Note: a detailed budget will be required for formal submission and review):					
Anticipated time to completion:					
Anticipated publication:					
Request for study medication (if yes, estimate amount):					
Sample size (if applicable):					

*ChemoCentryx Medical Affairs will notify you if the topic does, or does not, fit into an area of research that we would like to evaluate further. If there is initial interest, a protocol or at least synopsis of work to be conducted and detailed budget (if applicable) will be required. Approval of submissions is based on scientific merit, feasibility, alignment to the company's strategic focus, and budget considerations and research support is not connected in any way to the prescribing, referral or recommendation of a ChemoCentryx product.*
